EDUCATION

Computer and Artificial intelligence

Oct 2023 – Jul 2027 | Giza, Egypt

Cairo University

Artificial intelligence Department (GPA: 3.29 / 4, 29th on Artificial intelligence Department).

- **Relevant Courses:** Data Structure & Algorithms, Software engineering, Fundamentals of Machine Learning, Supervised Learning, Image Processing, Autonomous Multi-Agent Systems.

EXPERIENCE

Artificial Intelligence Engineer

May 2026 – Jul 2026 | Remote

LILT AI

- Engineered Arabic programming tasks and testing documentation to evaluate Claude Opus 4.6's cultural reasoning.
- Containerized evaluation environments utilizing **Docker** and **Harbor**, achieving a 100% PR acceptance rate.
- Validated peer-developed prompts to ensure high-fidelity cultural alignment and accurate AI instruction parsing.

Artificial Intelligence intern

Apr 2026 – Aug 2026 | Hybrid

Aitronix

- Built a **LangGraph** agent via **Facebook Graph API** to classify and route user interactions by intent.
- Developed a dynamic **LlamaIndex** RAG system for instant knowledge base updates via document uploads.
- Engineered a **Dockerized** backend (**FastAPI**, **PostgreSQL**, **Pydantic**) to manage order states and automated support tickets.

Data Scientist

Nov 2024 – Jul 2025 | Hybrid

Digital Egypt Pioneers initiatives

- Completed an intensive, government-backed program focusing on EDA, MLOps, and advanced deployment pipelines.
- Recognized for developing a "Top-Ranked DEPI Project" that was officially recommended for startup incubation.

PROJECTS

Cortex AI Chatbot

Customer Service AI Agent | LangChain, HuggingFace, FastAPI

- Developed an autonomous AI agent to eliminate manual triage bottlenecks in high-volume customer support environments.
- Built a low-latency 3-Agent Waterfall Architecture using FastAPI and Llama-3.1-8B-Instruct, integrating keyword classification, LLM intent routing, and a Smart RAG pipeline.

Satallitor

AI-Powered Earth Surface Analysis | YOLO, XGBoost, Flask, React

- Developed a geospatial AI platform performing semantic segmentation on satellite imagery, featuring a custom fertilizer recommendation model that achieved **98% accuracy**.
- Engineered end-to-end ML pipelines and integrated "**Stella**," an intelligent chatbot designed to deliver real-time, data-driven agricultural insights.
- Awarded 3rd place at the Creativa Menofia Entrepreneurship Hackathon for technical innovation and scalability.

AI Zatoona

AI Research Multi-Agent System | LangGraph, FastAPI, React Native, PostgreSQL

- Built a **React Native** mobile app to help researchers triage academic papers through daily automated AI summaries.
- Engineered a **FastAPI** and **PostgreSQL** backend, integrating a **LangGraph** AI pipeline to instantly parse and summarize on-demand arXiv URLs.
- Developed automated Notion data syncing for user archives and configured **GitHub Actions** for CI/CD deployment.

SKILLS

- **Languages:** Python, SQL, C++, TypeScript, JavaScript
- **Generative AI & LLMs:** LangGraph, LangChain, LlamaIndex, CrewAI, RAG, Vector Databases, LLM Evaluation, Prompt Engineering
- **AI, ML & NLP:** PyTorch, TensorFlow, Machine Learning, Computer Vision, NLP, Scikit-Learn
- **Backend & MLOps:** FastAPI, Django, Docker, PostgreSQL, MongoDB, MLflow, GitHub Actions (CI/CD), REST APIs
- **Frontend & Data:** React, React Native, Tailwind CSS, Pandas, NumPy, Data Visualization
